SUMMARY

Software engineer building C# and Python services on Azure, with a focus on automation, PostgreSQL data layers, and containerized deployments. Led a VM-to-container migration that made deployments 5x faster and cut infrastructure cost 80%, and keep medical device tracking at 99.9% uptime across 100k+ monthly transactions.

TECHNICAL SKILLS

Languages	C#, Python, TypeScript, JavaScript, SQL
Cloud & DevOps	Azure (Container Apps, API Management), Docker, CI/CD, GitHub Actions, Automation
Data	PostgreSQL, MongoDB, Pandas, Data pipelines
Frameworks & tools	.NET, Flask, FastAPI, Node.js, React, Git, Pytest, Jira, Power BI

EXPERIENCE

Software Engineer · Global Med Logistics Feb 2024 – Present

- Led the migration from virtual machines to Azure Container Apps Jobs (Docker), building the C# and Python services that run on it; deployments 5x faster, infrastructure cost down 80%.
- Automated the shipment data pipeline in Python and C# on scheduled Azure container jobs, writing to PostgreSQL and cutting manual processing by 40%.
- Engineered a high-availability API gateway on Azure API Management, backed by C# services, for real-time tracking across third-party partners.
- Own the PostgreSQL data layer behind medical device tracking for Stryker: 99.9% uptime and 100% data accuracy across 100k+ monthly transactions.

Website Developer Intern · Engaj Media May 2023 – Dec 2023

- Worked within an Agile (Scrum) team to deliver a high-performance TypeScript/React landing page, implementing lazy loading and component optimization to Increase consultation requests by 35%.
- Optimized website performance through code refactoring and modern development practices, ensuring cross-browser compatibility and mobile responsiveness.

Freelance Software Engineer · YongMen Law P.C Dec 2022 – Mar 2023

- Developed client communication system integrating Mailchimp API for automated email workflows, reducing manual follow-ups by 30%.
- Optimized website performance by diagnosing issues via Google Analytics (e.g., bounce rates, exit pages) and implementing UI/SEO fixes that grew traffic 25% MoM.

EDUCATION

App Academy · Full-Stack Software Engineering Feb 2022 – Nov 2022

Immersive full-stack program: algorithms, web development, and team projects run on Agile.

Georgia State University · Business Administration Aug 2014 – Jul 2017

Coursework in business administration and management.
